DURABILITY & FUNCTIONALITY

EF Series Folding Tables

EF Series Tables are built with a plywood core so that they will withstand years of rough handling. Plywood is light in weight, resistant to corner impact breakage and strong enough to support heavy loads under constant use. We support our table tops with the strongest steel channel frame and the most durable and easy to operate leg components in the industry. EF Series Tables will look good, while performing flawlessly longer than any table you have ever owned.

Features and Benefits

- High pressure laminate surface
- 3/4" thick plywood core top
- 14 gauge, 1.05" diameter wishbone legs
- Spring-bolt locking leg braces

Solid 3/4" thick plywood is surfaced with high pressure plastic laminate, sealed with a backing sheet and edged with vinyl T-molding.

Leg braces incorporate spring loaded, case hardened steel detents for a long life and fast set-up & tear-down.

Tops are reinforced against breakage with a square corner steel frame.

Extra thick, 14 gauge steel leg construction stands up to heavy use without bending. Non-removable, high impact plastic leg glides protect floors.

F Series Folding Tables

Our most economical series of tables incorporates a high pressure laminate surfaced, solid core top with our heavy-duty understructure. Legs, utilizing 14 gauge thick steel tubing in the critical load bearing members, are much thicker and resistant to bending than other tables. Spring-bolt brace mechanisms ensure that these attractive tables will stand up to years of constant use and handling. If your application involves rough use and handling, we suggest you consider our plywood core or lightweight plastic top models.

Features and Benefits

- High pressure laminate surface
- 5/8" thick particleboard core top
- 14 gauge, 1.05" diameter legs
- Spring-bolt locking leg braces

Leg braces incorporate spring loaded, case hardened steel detents for a long life and fast set-up & tear-down.

Extra thick, 14 gauge steel leg construction stands up to heavy use without bending. Non-removable, high impact plastic leg glides protect floors.

E Series Folding Tables

3/4" plywood stained surface with galvanized steel provides maximum edge protection to our top of the line plywood top tables. Optional padded tops can be added, which feature 1/16" thick, cushioned back, white vinyl laminated to a 3/4" plywood core. Because steel edging is so tough, it easily stands up to rolling and dragging over concrete floors like no other edging material. Bolted, hardwood runners carry the heaviest loads and allow for safe stacking during storage. Our 14 gauge, 1.05" diameter all-welded legs are built to handle the worst punishment that your staff may dish out. The time tested, hardened steel braces securely lock the legs in place no matter how often the tables are set up and folded for storage.

EP Series

E Series

Features and Benefits

- 3/4" thick, AC grade, exterior glue plywood stained surface
- 18 gauge, galvanized steel edge
- 14 gauge, 1.05" diameter steel legs
- Spring-bolt locking leg braces
- Through-bolted, hardwood runners
- Optional padded top

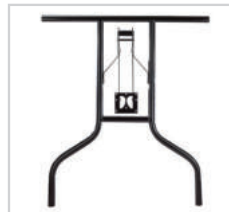

Table top edges are protected with 18 gauge formed steel angles, anchored securely with screws.

Galvanized steel edges allow round tables to be rolled on concrete floors without creating sharp burrs that may damage table linens.

Hardwood runners are anchored to the table top with recessed bolts stand up to the heaviest loads.

Wishbone style legs feature one-piece floor to table top support and double cross bracing for maximum strength.

Extra thick, 14 gauge steel leg construction stands up to heavy use without bending. Non-removable, high impact plastic leg glides protect floors.

Leg braces incorporate spring loaded, case hardened steel detents for a long life and fast set-up & tear-down.

Hexalite® (NLW) Folding Tables

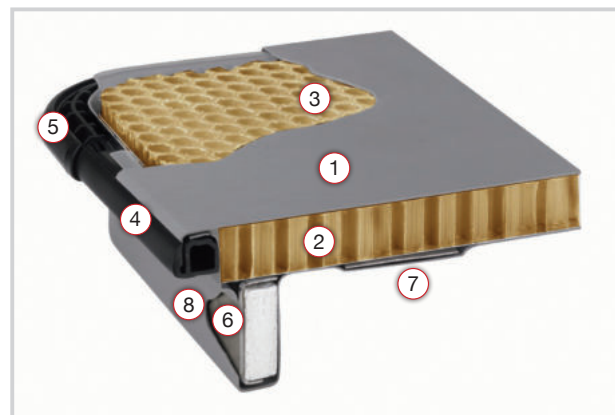

Hexalite® banquet and meeting room tables meet the changing needs of today's busy public assembly facilities. Our innovative construction utilizes condensed cell honeycomb core material that is epoxy bonded to a durable outer shell of thermoformed ABS plastic. ABS plastic is the same material that pro football helmets are made from.

Add an internal, steel channel support frame to the most durable legs found anywhere in the industry and you have a lightweight table that anyone can handle, yet it is so durable that it's backed by a 10-year warranty. This may be the last table that you will ever have to buy.

Features and Benefits

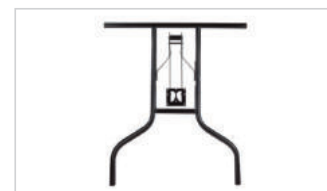

1. The thermoformed, high-impact ABS plastic is extremely durable and stain resistant.
2. Our innovative construction utilizes condensed cell honeycomb core material that is epoxy bonded to a durable outer shell of thermoformed ABS plastic.
3. Bonding of the outer ABS plastic skin to the honeycomb is aided by a continuous, non-woven substrate that is fused to the honeycomb core to provide a 100% bonding area for the epoxy adhesive. This construction results in maximum tensile and peel strength.
4. A multi-wall bumper edge molding, composed of high-impact PVC plastic, is bonded to the table's ABS top and bottom to provide five layers of protection against impact from rough handling.
5. Corners are protected against damage by high-impact, injection molded, PVC guards. Corner guards are reinforced with integral ribs and joined to the bumper edge molding with interlocking tenons.
6. Formed channels of 16-gauge steel surround the tabletop to provide maximum support for heavy loads. No wood is used in this product!
7. Steel plates are epoxy bonded to ABS plastic bottom and the honeycomb core to provide solid anchoring points for the legs and the leg brace mechanisms.
8. The underside of the tabletop is surfaced with thermoformed, ABS plastic to completely encase all internal core and frame members.

Leg braces incorporate spring loaded, case hardened steel detents for a long life and fast set-up & tear-down.

1" diameter 16 gauge steel legs are capped with non-removable, high impact plastic glides.

Wishbone style legs feature one-piece floor to table support and double cross bracing for maximum strength.

Table Caddies - Rectangle/Round

Round and rectangle table caddies are offered in two models that are designed to roll long distances and make transporting folding tables a breeze.

Heavy Duty (Rectangle/Round)

- Designed to roll on concrete, tile or carpeted floors
- 6" diameter, 1 3/8" wide, polyurethane wheels
- Roller bearing axel
- Swivel plate casters mounted to a heavy gauge welded steel frame
- Carpeted crossbeams
- Side rails are covered with neoprene rubber to protect tables
- Optional handle brace for extra security on round table caddy

UpperZone Multi-Level Rack System

Midwest's Upper Zone system saves space, increases operational efficiency, improves housekeeping and is easy to use. Each truck is stored within a permanent rack structure with all levels above the floor supported by the rack structure. Trucks stored on the floor may be rolled in and out of the system manually. This means that no forklift truck is needed for the equipment you use most of the time. As additional equipment is needed, a forklift retrieves trucks from the next higher level. The highest level is accessed only for your largest functions. Since our trucks are not required to support the load of other trucks, no heavy overhead frame structure is needed. This makes our trucks easier to load, unload and move within your facility.

Features and Benefits

- Increases efficiency, safety and organization
- Save storage space
- Optional towing bars with gravity storage position lock
- Designed for forklift handling
- Can store up to three levels above the floor
- Reduces construction costs
- Easy to use

UpperZone Table and Chair Trucks

UpperZone table and chair trucks have been designed to reduce set up costs, improve safety and save storage space. The heavy-duty structural steel tubular frames, high load capacity casters and neoprene rubber padded storage containment structures make these trucks the best long-term investment in the hospitality industry. When used with a specially engineered, multilevel, drive-in storage rack structure, a high capacity storage system can reduce your floor space requirements by as much as 50%.

Features and Benefits

- 1 1/2" x 3", 14 gauge, welded steel tube frame
- 1 1/4" diameter, 14 gauge end frames and handles
- Neoprene padded, inclined bed design insures stacking stability
- 6" diameter x 2" wide, polyolefin casters (two rigid, two swivel with brakes)
- Optional towing bars with gravity storage position lock
- Designed for forklift handling

Multi-Height Cocktail Tables

The Multi-Height Adjustable Cocktail and Bistro Table column serves (3) heights: 30",36" & 42", all in one unit! You no longer need to buy 2 or 3 columns to serve one set of bases. Operation is simple with user-friendly thumb buttons to adjust heights. With Midwest's Multi-Height Cocktail Tables you always have the right table, regardless if it's a standing or seated function. No other table delivers so much flexibility.

Features and Benefits

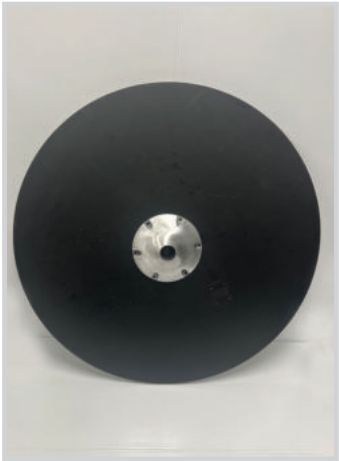

- Simple operation with user-friendly thumb button to adjust height
- Easily disassembled for compact storage
- Low profile designed tops save on space storage
- Easily assembled with hand operated knob. No tools required
- Available in Chrome only with adjustable leg or fixed leg

Café Series Tables

Midwest Folding Product's Café Series has the answer for your cafe, restaurant, or bar. Whether you need completely new tables or just want to replace or update your current table tops we can help. Our tops start with a heavy-duty 1-1/8 inch particle board core. We then attach a high-pressure laminate top and a high-density polyethylene backer. A t-mold edging provides side impact resistance.

For the ultimate strength and ease of assembly, we use metal inserts and bolts to attach our tops to our bases. No drilling required! Several base options are available: cafe style, bar height, bar height with foot ring, ADA compliant, 3 prongs, 4 prongs, round.

Need a custom laminated top to match your decor? Need a custom shape/size? No problem we can provide hundreds of laminate options from the top suppliers in the industry. Our in-house CNC can produce tops to your exact specifications.

Features and Benefits

- High-pressure laminated top provides a very durable, easy-to-clean surface
- Tops made from heavy-duty 1 1/8" particleboard core
- No drilling is required to assemble our tops to our bases
- Cast Iron bases provide the ultimate durability Lifetime warranty on base
- 3-year warranty on tabletops

X-Fold Tables

X-FOLD tables combine the stability of a tubular steel folding understructure with the durability of a solid plywood core top surfaced with ABS plastic, HP laminate or a stained surface. When opened for use, the four points of contact with the floor ensure maximum stability. Tables may be folded to a vertical position for efficient storage.

The possible uses of this table are many and varied. Educational applications range from the cafeteria and common areas to the classroom and student events. Churches and other public assembly facilities will find these tables useful for receptions and other gatherings.

Features and Benefits

- 30" and 42" heights available
- 1" diameter, 16 gauge steel tube legs
- Wide leg base for maximum stability
- Easy to operate folding mechanism
- Space saving vertical storage
- Easy to clean surface
- Durable vinyl or galvanized steel edge

Mobile Buffet/Utility Tables

Save time and increase flexibility with Midwest's mobile buffet/utility units. Tables may be fully prepared prior to the event and then rolled to the desired location when needed. The detachable riser shelf may be used to add a second tier for buffet setups or to create a mobile bar. A multitude of uses, ranging from mobile registration or demonstration tables to mobile computer tables, make these units ideal for use in any facility.

Features and Benefits

- Offered in two finishing tops: E (Plywood Stained) and EF (Laminated Over Plywood)
- Heavy-duty steel frames
- Facilitates easy movement of supplies
- Folds for compact storage
- Detachable riser shelf

CP Series Training Tables

CP Series Training Tables are available in four different models and finishes. You will find the CP Series provides both style, with an enhanced appearance, as well as functionality. Your guests' satisfaction is a priority and the CP Series table delivers! It's not what the CP Series tables have as much as what they don't. CP Series tables were designed without the legs that used to get in the way of guest comfort. No more bruised knees, torn hosiery, spilled coffee or your guests hanging out in the aisle. CP Series offer long-term durability, as well as features like spring bolt locking braces, which hold table legs open or closed. Aesthetics meets serviceability with the CP Series.

Features and Benefits

- Improved comfort
- Increased seating capacity
- Enhanced appearance
- Long-term durability

CTL and CTLA Series Training Tables

CTL Series Training/Seminar Tables are available in six different models with your choice of 5/8" particleboard core or 3/4" thick plywood core. CTL Series was designed to provide maximum user comfort and feature either fixed or adjustable height cantilever style legs. This series provides improved comfort, increased seating capacity, enhanced appearance and long-term durability. The CTL Series features a spring bolt locking brace, which holds table legs open or closed. This Series exhibits a sleek and professional exterior with a wide range of standard or custom high-pressure decorative laminate tabletops and black or brown vinyl bull nose moldings.

Features and Benefits

- High pressure plastic laminate surface with vinyl edge
- 5/8" particleboard core or 3/4" plywood
- Black metal finish only
- Folding cantilever legs
- Stores on edge with TEC caddy
- Available in adjustable height

TL and TLA Conference Tables

TL Series folding conference tables are constructed of 3/4" plywood or 5/8" particle core with a high-pressure laminate finish. From the lecture hall to the boardroom, our TL Series folding tables are attractive, yet durable, with reliable performance that will fit your budget. The highly durable series includes a vinyl T-mold edge banding that protects the table from chipping. Sturdy legs are 14-gauge steel with a chrome-plated finish. The standard black metal finish with chrome inserts enhances the overall appearance along with decorative leg panels, which match the tabletop finish. The TL Series is well designed and features a spring-bolt locking leg brace that promotes stability, as well as plastic leg glides that safeguard the floor. The TL Series is available with either fixed or adjustable legs to promote maximum user comfort. Adjustable legs may be repositioned vertically in 1" increments to conform to your needs.

Fixed Height or Adjustable Height

Features and Benefits

- 3/4" plywood or 5/8" particleboard core with a high-pressure laminate finish
- Long-term durability
- 14-gauge steel legs with chrome plated finish
- Features spring-bolt locking leg brace
- Plastic leg glides keep floors safe
- Available in adjustable height

Mobile Stages

One person can roll Midwest mobile stages easily from storage to the event location. Opening the stage deck automatically lifts casters from the floor to prevent movement when the stage is in use. Integral drop-in couplings allow stages to be joined together. Stages safely support a uniform load of 200 pounds per square foot. From compact storage to event location, mobile stages save set-up time and increase facility flexibility.

Features and Benefits

- Drop-in couplings allow stages to be joined together
- Safely support a more uniform load of 200 pounds per square foot
- Save set-up time
- Increase facility flexibility
- Safety tested and listed by Underwriters Laboratories

TransFold™ Portable Stages

TransFold Stages give you the freedom to configure the stage to create any performance environment you can imagine. Our various sizes give you the flexibility to build the exact size and shape stage that you need to accommodate your event. With TransFold, you are the director.

Features and Benefits

- Up to 4 different heights
- Units fold to store
- When folded, units fold to 2" in height when stacked
- Constructed of heavy gauge steel and laminated plywood core decking for unsurpassed safety
- Guard rails are furnished for uppermost level of the riser set
- Expansion sections available
- Weight capacity of 200 lbs/ft², evenly distributed

Simple and Secure Height Adjustment

The legs on dual height stage units are easy to adjust. Telescoping leg inserts are secured to the leg's receiver tubes with clevis pins having spring loaded detentes for added security. Clevis pins are attached to the legs with lanyards for added convenience. Tightening the knob assures a wobble free connection. Special height adjustments are available upon request.

Built In Coupling Lock System

Stage units are equipped with integral couplings that may be selectively engaged as needed to join platforms of the same height or platforms that are 8" different in height. Coupling devices are permanently attached.

Heavy Duty Construction

Stage and riser decks are constructed with solid plywood, laminated with tempered hardboard on top and bottom. Decks are surrounded and supported by 16 gauge formed steel channels for maximum carrying capacity.

Additional Stage and Riser Accessories can be found on pages 24-25.

TransFold™ Choral Risers - Standing

TransFold is ready to go wherever your choir performs. Built-in wheels make it easy to roll the TransFold unit from the classroom to the auditorium or up stairways and on to a bus or van. Upon arrival at the performance venue, your TransFold risers set up in seconds, so that they will be ready when you are. Midwest's exclusive, gas-spring assisted design allows the unit to open with moderate foot pressure, taking the strain out of set up. This also ensures a safe, controlled motion when folding the unit for transportation and storage.

Features and Benefits

- Built-in wheels
- Gas-spring assisted opens with moderate foot pressure
- Easily transported and stored
